Stylish-Durable-Clean High End Glass Pipe Housed In Aluminum Iron Man Suit

Introducing the premier chillum-style glass pipe in the industry: The Pypetek Prometheus Nano. This singular design combines the discrete portability of a traditional glass one-hitter with the unparalleled durability of the Pypetek Prometheus system.

Why SI Pipes?

Created in 2009, this unique system filters out between 75% and 100% of tars, pesticides and carcinogens resulting in the healthiest way to enjoy every inhalation. This filtration system is backed by independent research and thousands of happy customers too.

The triple filtered process starts with 100% Virgin Coconut Carbon. As smoke enters the carbon filter tube and passes through the carbon, the filtration process has started. Then the smoke enters the water and is diffused and additional impurities are removed from the surface of the many small smoke bubbles. Last, as the smoke passes through our 100% Organic Cotton, it is filtered for the third time to remove further impurities.
